

Mental Health in Tech

Tech Interview | EDA

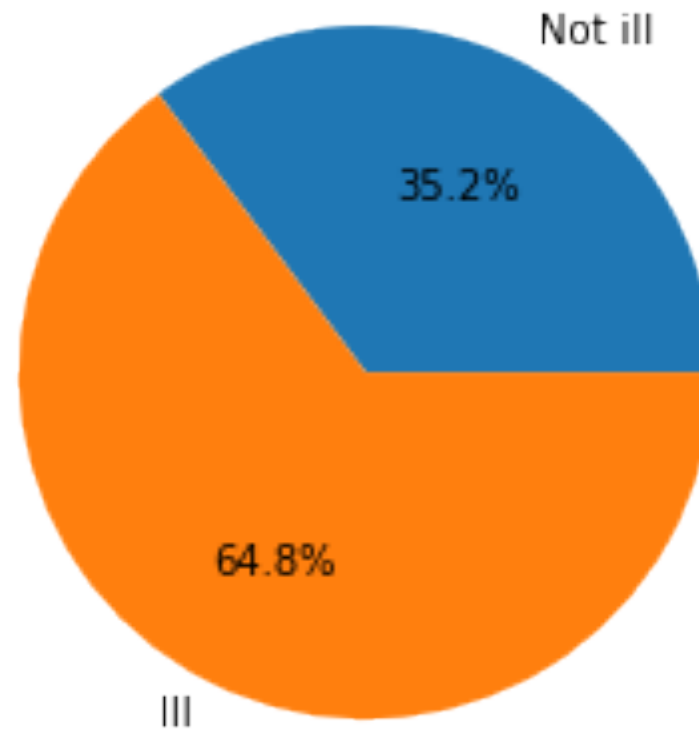

Luís Saúde

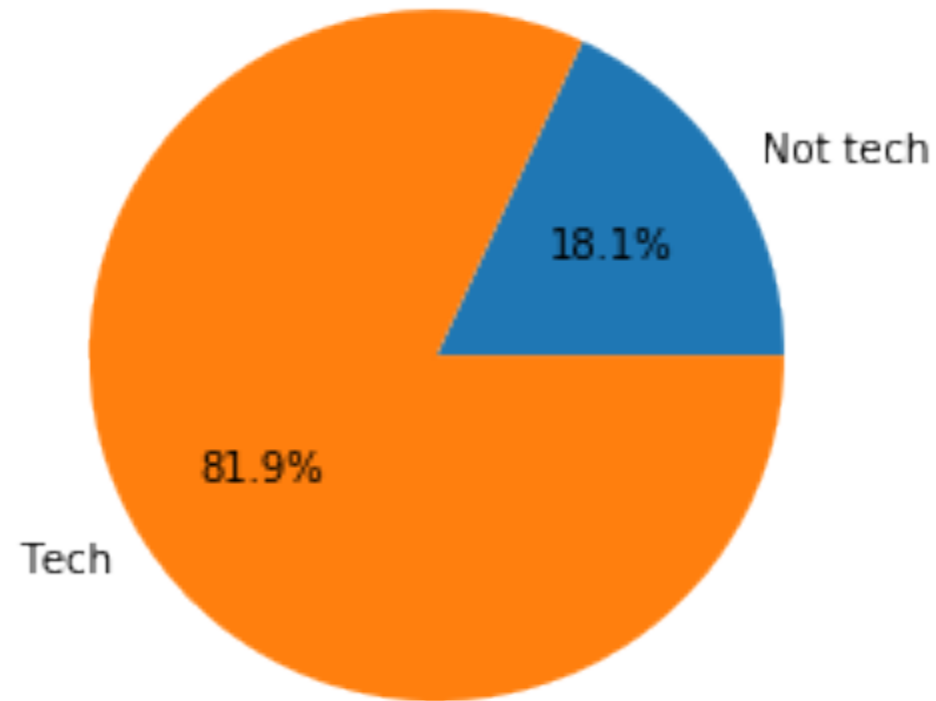

Analysis based on this questions:

- Mentally ill workers in the survey;
- Workers in the tech industry;
- Tech industry and mental illness;
- Self-employed workers and mental illness;
- Mental illness interference at work;
- Mental illness discussion at work;
- Mental illness discussion in interviews.

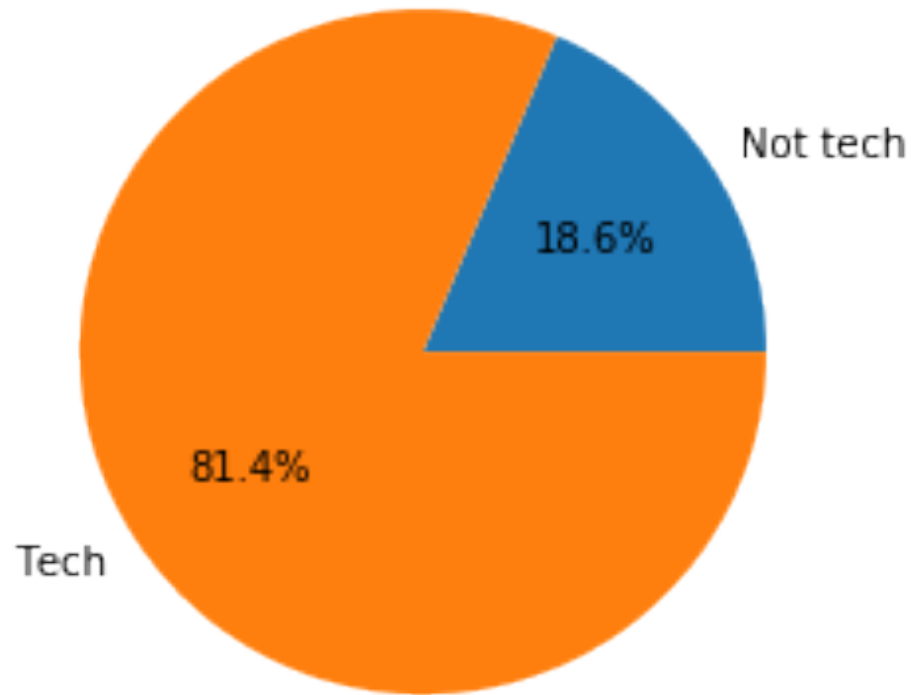

Mentally ill workers in the survey

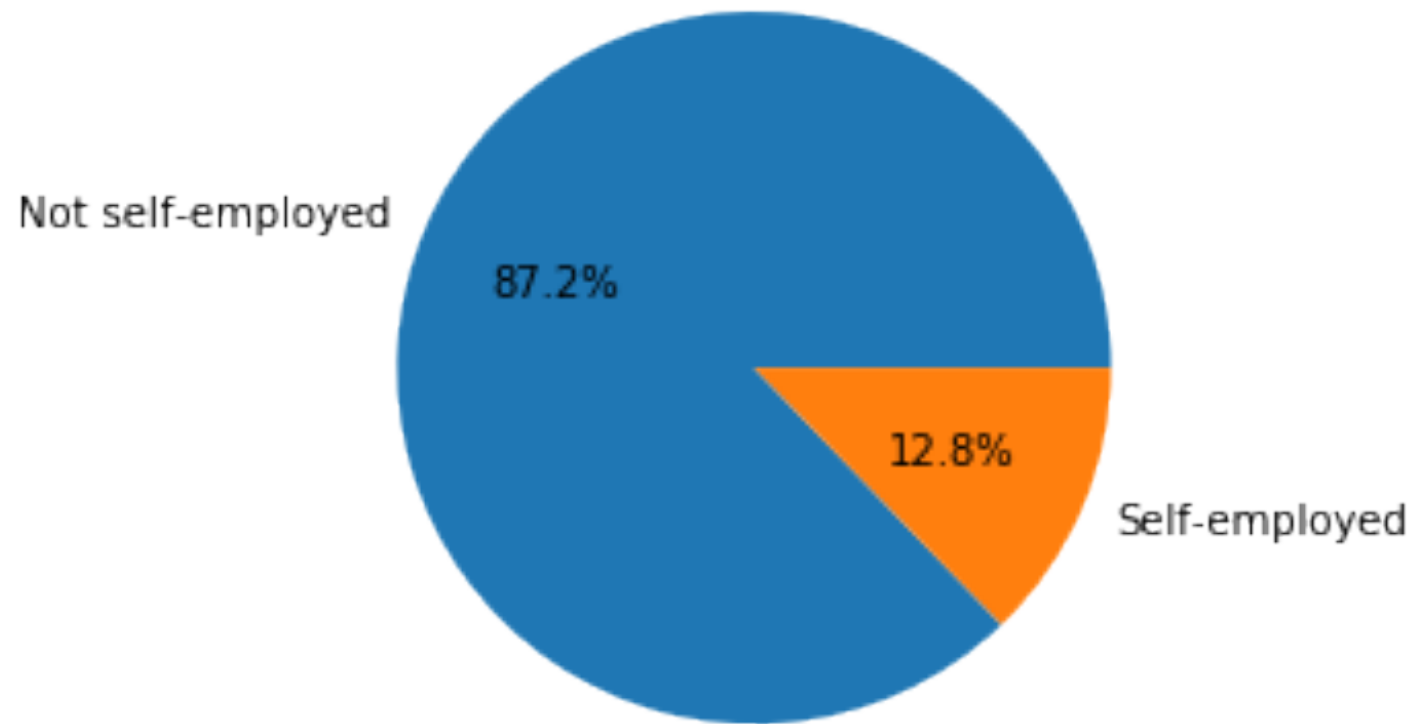

Workers in the tech industry

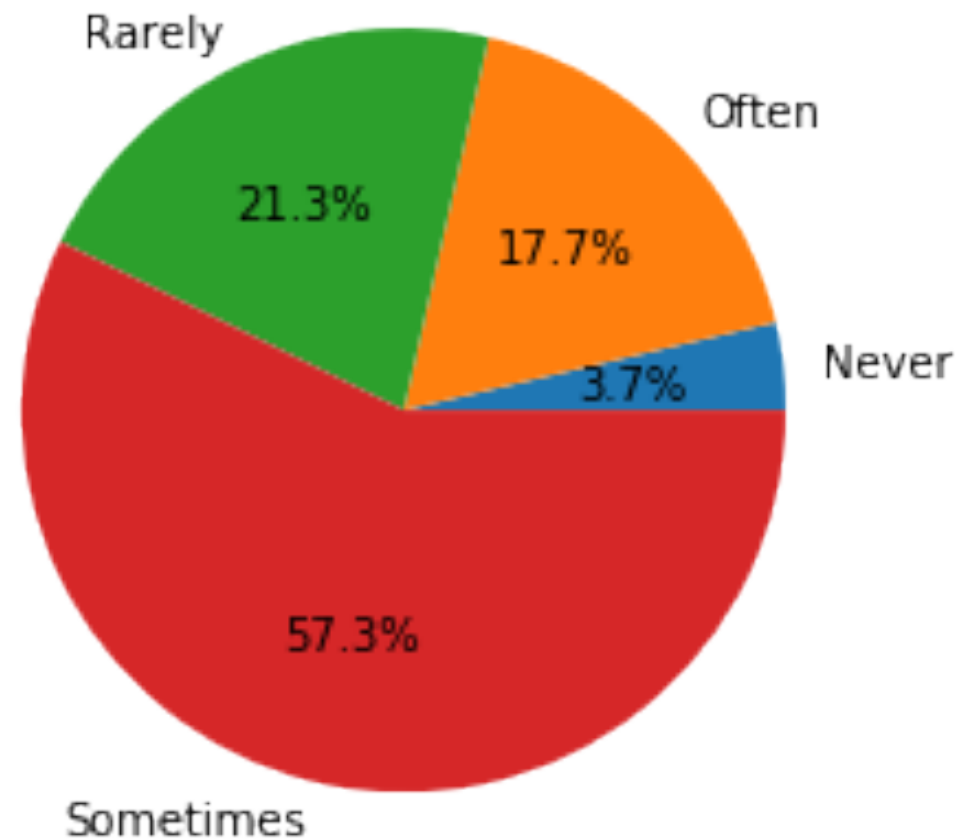

Tech industry and mental illness

Self-employed workers and mental illness

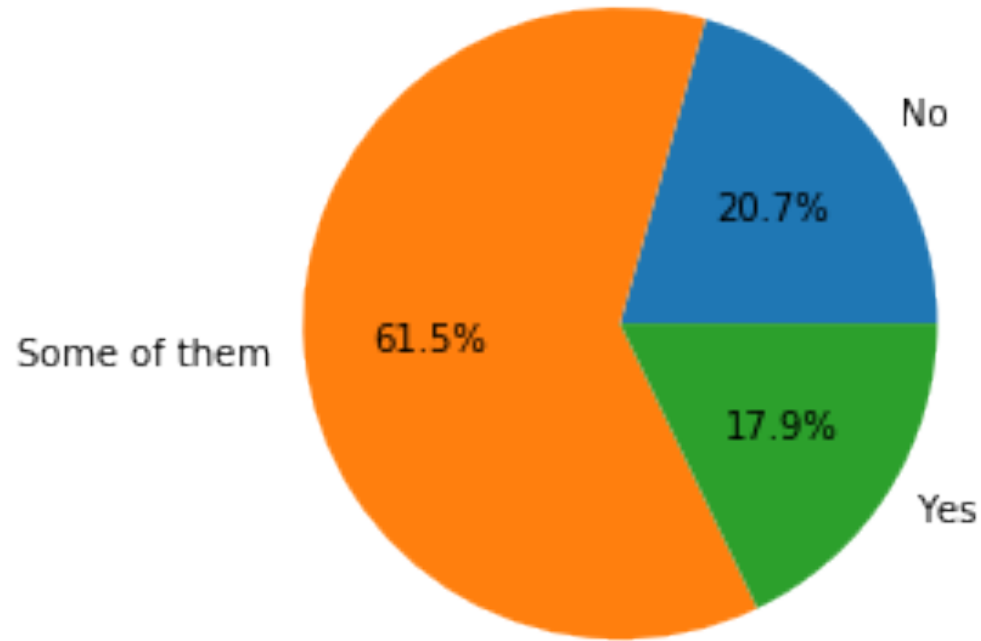

Mental illness interference at work

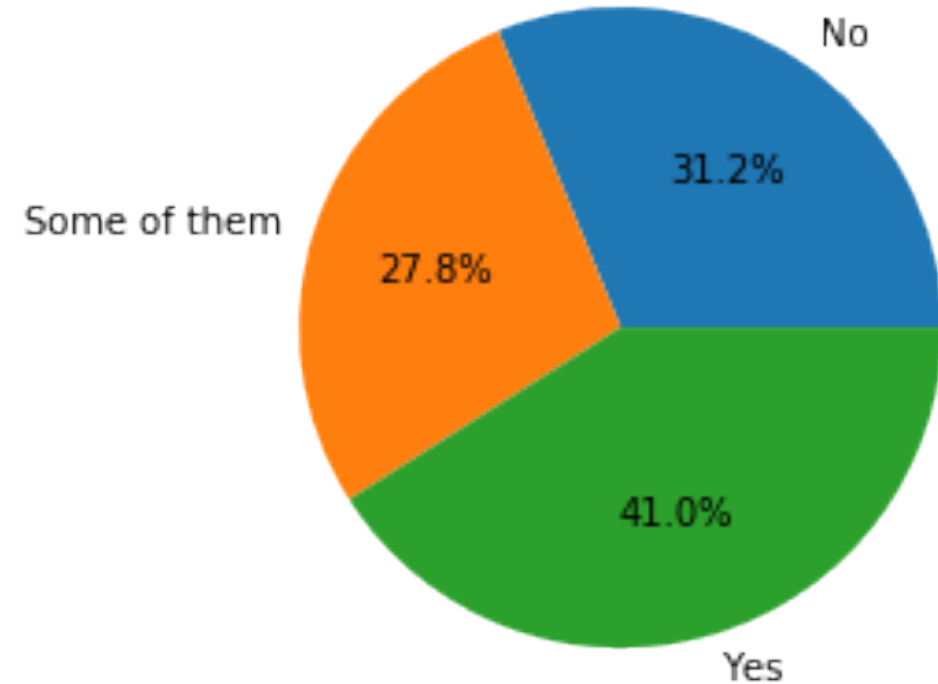

Mental illness discussion at work

With co-workers

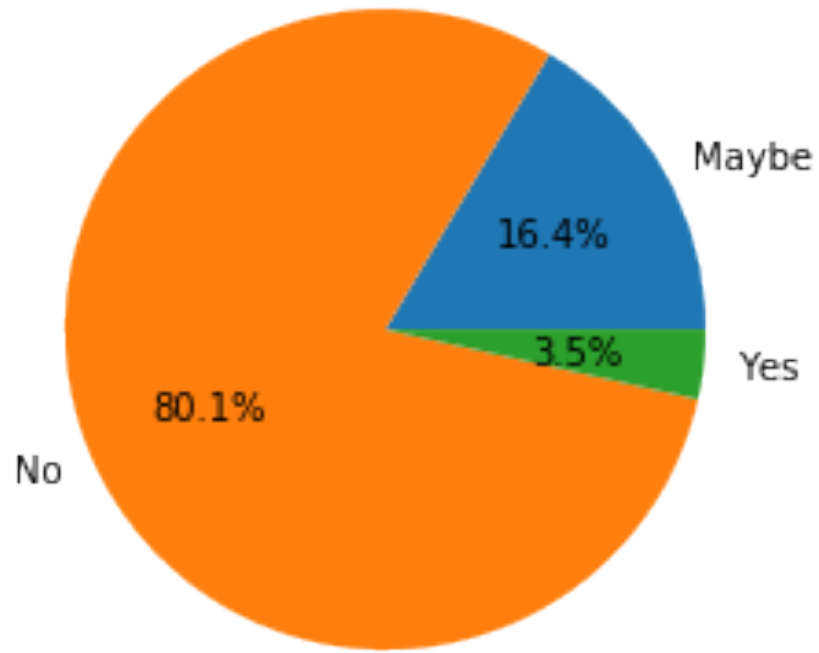

With supervisors

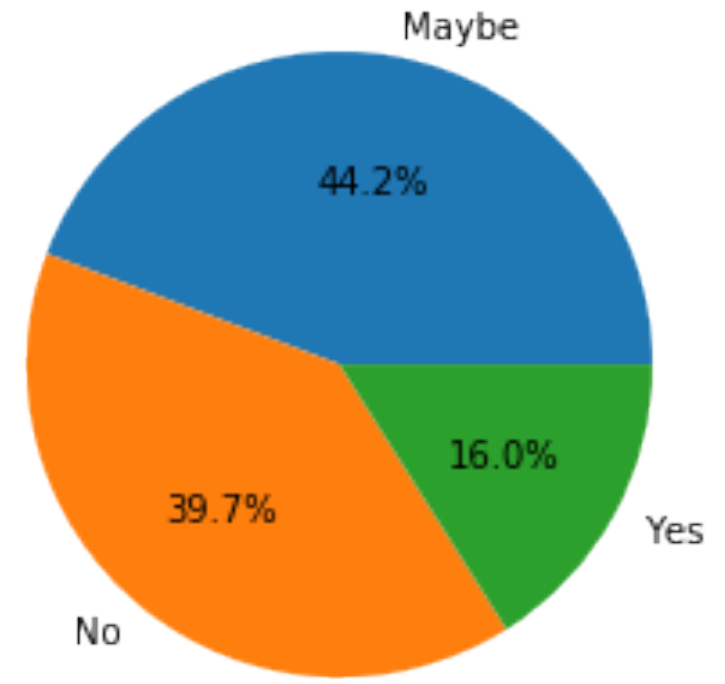

Mental illness discussion in interviews

Mental illness

Physical disability

Notes

- With the labs I had to finished I didn't have the time to make a "decent" report;
- These were the questions that seemed more relevant to raise when approaching this dataset;
- I've tried to answer the survey but it was closed. I would like to know more about the conduction of the survey because I think that some assumptions are incorrect (eg. A lot more mental ill workers than non mental ill)
- I was not surprised by the majority of conclusions of the questions except by the more willingness to discuss the mental illness with the supervisors than the coworkers
